## TRANSFORM YOUR HOME WITH AN ORIGIN POOL

### AT ORIGIN WE DO IT ALL FROM CONCEPT TO COMPLETION

For over 40 years, Origin has helped thousands of families to design and build their dream home swimming pools. Our award winning pool houses let you swim, exercise in your home gym and relax in your spa or steam room, all from the privacy of your own home. At Origin, we work closely with you to create a swimming pool design that suits your home, lifestyle and budget, resulting in the perfect keep fit, chill out or social hub for you and your family.

We offer a holistic approach to each project to ensure that every individual element works seamlessly together. Every pool project is unique and requires expert input from our multiple professionals. We believe a successful project requires all of the specialist areas to be integrated into a consolidated design from the start.

As a multi-award winning company we are proud to have a reputation synonymous with quality, luxury and the highest standards of swimming pool design. Working with our years of experience and dedicated team of architects, designers, engineers and project managers we have been able to consistently add to our accolades whilst developing our portfolio.

# WHY ORIGIN IS DIFFERENT

At Origin, we work closely with you to create a swimming pool design to suit your home, lifestyle and budget. Every pool project is unique and requires expert input from multiple professionals. We believe a successful project requires all of the specialist areas to be integrated into a consolidated design from the start. The process of designing and building a pool house is quite unlike any other building project as an indoor swimming pool consists of three major areas that require specialist design: heating, ventilation and dehumidification.

At Origin, we manage everything for you. Eliminating the need for you to hire and manage separate companies for each element of the build, removing the potential risks and headache of liaising with individual professionals.

We are unique in that our team consists of specialist engineers, designers and architects with years of experience. We take control of the whole project from the initial design to the construction, building and maintenance of the completed pool so you can relax, secure in the knowledge that our experts will all be working together to the same brief from the start.

## PLAN

The planning part of the process involves a free consultation with one of Origin's senior management team and covers every aspect needed to get your pool project up and running, including

- Feasibility studies
- Concept design
- Architectural drawings
- 3D CAD and colour visuals
- Planning applications

## DESIGN

Attention to detail is crucial to achieve a beautiful and successful pool and pool house. We offer a holistic approach to each project to ensure every individual element works seamlessly together. Our specialist design briefs encompass

- Structural engineering
- Specialist heating, ventilation and dehumidification design
- Pool chamber and plant room
- Building fabric detailing and regulation drawings
- Green energy considerations
- Lighting and interior design

## BUILD

We manage every aspect of the build, overseeing our dedicated team of pool and building construction experts to ensure every project runs smoothly and on time. This covers

- Project management
- Construction
- Client liaison
- Training and handover

## MAINTAIN

Origin offers a comprehensive maintenance service for your pool and pool house so it can be looked after by the experienced team that knows it best. This includes

- Routine maintenance
- Reactionary support
- Seasonal preparation
- Water health checks
- Pool and pool house refurbishment

# THE ORIGIN POOL RANGE

We specialise in the design, construction and maintenance of indoor swimming pools throughout the South East and home counties. Our award winning designs have been delivered by our dedicated team of experts for over 40 years.

We eliminate the need for you to employ and manage separate companies for each element of the build, removing the potential risks, duplications and headache of liaising

between architects, engineers and contractors.

Simply put, we do it all. We work with you throughout the planning and designing stage, keeping you informed of every step during the build so you can relax, secure in the knowledge the experts at Origin will be working together to the same brief from the start.

**“ORIGIN GUIDED US THROUGH EVERY STEP OF THE WAY, WHICH WE FOUND MOST VALUABLE.”**

## OLYMPIC

## BARN

## EXTENSION

# THE BARN RANGE

The quintessential British style of the Barn range is a blend of traditional design and modern ethical considerations. Origin's Barn range allows you to have a swimming pool building with all the charm of a country barn conversion. It blends in with your surroundings and emulates the countryside aesthetic, helping you get back to basics with nature.

Available in a variety of sizes and finished in a horizontal timber weatherboard exterior that can be stained or painted to suit your preferred colour palette, every element of the Barn pool house can be tailored to suit your needs. The internal finishes are light, contemporary and airy with a choice of natural or white wash timber roof. The Barn pool house is also an energy efficient design due to the improved layers of insulation and comes fully equipped with all filtration, heating and circulation equipment.

**"THE STRUCTURE FITS IN WITH THE SURROUNDING AREA SO WELL, IT REALLY LOOKS LIKE IT'S BEEN THERE FOREVER."**

**"IT REALLY IS OUR OWN OASIS, EVEN IN THE POOL YOU'RE SURROUNDED BY NATURE AND TRANSPORTED TO A TRANQUIL PLACE"**

Whether your pool is to be used for fun or fitness, the Barn sits well in any rural garden setting as a design solution to finding space for an indoor pool. The selection of building sizes include different specifications and the opportunity to personalise your swimming pool house to your wants and needs. If you want your pool house to be a place of wellness, the Barn gives you the scope to add a gym, yoga room, juice bar or steam room and sauna. A porch extension and patio make the most of the outside space and blend the pool house into the garden and surrounding area. The design looks effortlessly natural and brings the outside in. It is a simple reflection of country style, giving you the best of both worlds.

## THE OLYMPIC RANGE

The Olympic has become one of Origin's most sought after ranges. The all-new Olympic range has been improved and refined – reducing energy consumption, increasing thermal efficiency, new materials and finishes options to make it even easier to personalise your design to suit your taste and achieve your dream pool house.

The Olympic range has four new customisable models to choose from. They vary in size and incorporate different facilities to suit your requirements.

***A recent Swim England study revealed people who swim regularly feel up to 12 years younger than non-swimmers***

Designed and built to the highest standards, our natural timber building is made from fully renewable sources and blends beautifully into a garden setting, helping you feel at one with nature. We're also putting our best green foot forward and incorporating sustainable and eco friendly elements in our most economical design yet. This indoor pool comes fully equipped with all the associated plant, filtration, heating, circulation equipment, dehumidification system, including an automatic deck mounted slatted pool cover in white. The internal finishes are light, contemporary and airy consisting of painted plaster walls, tiled floors and a choice of natural or white wash timber roof design. The exterior can be finished in a wide range of colours or optional brick or painted render can be added. The glazed lantern and aluminium bi-fold doors make this a warm and welcoming environment even during the cold winter months. Owning an Origin pool is about more than just the pool itself, it's about the lifestyle that comes with it and with the Olympic range you get all that and more. Swimming is an incredible form of exercise with a long list of health advantages, both mental and physical. Your swimming pool and pool house will help you reap the benefits and become a centre of wellness and exercise for everyone to enjoy.

## EXTENSIONS

Swimming pool extension design is about creating harmony between your home and swimming pool house. It is essential that your pool extension not only looks stunning but also becomes a seamless addition to your living environment. If you're looking to create a space in your home that can become a room in its own right and be a social hub for all your family and friends to enjoy then an extension might be the right move for you.

The experts at Origin can talk you through your options and will work with you to design your vision, whatever that may be.

***"Our friends are amazed by the complexity of the design!"***

Pool house extension advantages:

- Your indoor pool becomes another recreational area of your main home
- Convenient way to incorporate swimming into your everyday life and daily routine
- Ease of access when the weather is poor

Disadvantages:

- Typically increased cost due to materials selection and additional work to existing property
- More advanced dehumidification systems are essential
- Increased disruption during construction
- Usually requires a formal planning application

Almost without exception, a pool house extension to your home will need planning permission. At Origin, we have a wealth of experience in gaining planning approval for indoor pools in listed buildings, areas of outstanding natural beauty and conservation areas. We'll also manage the whole process for you, so no need to panic!

***"Seeing how the pool fits in has made us see the house in a whole new light. We are particularly impressed with how well the structure blends in with the original house – no one can believe it's a new extension!"***

***"IT HAS REALLY BECOME THE SOCIAL HUB OF THE HOME AND KEEPS THE WHOLE FAMILY ACTIVE!"***

*“The space  
has been  
entirely  
revolutionised”*

## BESPOKE

Do you already have a design in mind? Are you looking for something out of the ordinary? Then our bespoke design and build service is what you need. Our specialist swimming pool design and construction team are ideally positioned to guide you through the entire experience. We know building an indoor swimming pool is like no other project and it's even more of a challenge when a client comes to us with a completely original idea. Sometimes the best ideas are born out of necessity and here at Origin we will help plan, design and build a swimming pool and pool house that's perfect for you.

## HYDROTHERAPY POOLS

Origin has over 40 years experience in designing and constructing hydrotherapy pools and has a unique understanding of the physical and mental benefits of this form of natural therapy. Each hydrotherapy pool is designed with the individual needs of the user, carer and family in mind. So, what are the main considerations when building a hydrotherapy pool?

Unlike traditional domestic swimming pools, building hydrotherapy pools requires specialist knowledge and equipment. A hydro pool needs to be tailored to the specific needs of the individual which will have an effect on the planning and design as well as the equipment required

and cost.

At Origin, we believe it's the smaller details that make the difference so we take time to understand how the hydrotherapy pool may help the user, both now and in the future if their requirements change. While a hydro pool is crucial for pain relief and treating major physical ailments, it isn't just the water that's important. Every element of a hydro pool and pool house can impact on the comfort of the user, from lighting and heating to the strength of the jets and sounds. That's why Origin do it all, taking care of everything and working to the same brief from the start ensuring that your pool journey is as smooth as possible.

# OUTDOOR POOLS

Although here at Origin we pride ourselves on being indoor swimming pool specialists, we do take on outdoor pool commissions. We are constantly looking for new and exciting challenges and love it when a customer comes to us with a truly unique idea for an outdoor swimming pool. As potentially one of the largest components of your garden, a swimming pool requires a lot of thought and planning in determining where to put it. You will need to consider the path of the sun, proximity to trees, ground levels and topography as well as safety and security and the ability to maintain surveillance of the pool from your house. Typically, the pool surroundings will also include a paved area, landscaping and planting.

The choices you make during construction will determine the longevity and running costs of your pool. It's common practice to have an insulated chamber on outdoor pools as this helps to reduce your running costs as well as being more eco-friendly. Our experts can talk you through the options and design a solution to fit your needs whatever you decide.

***"We wouldn't change a thing, it's exactly how we imagined it."***

## WHO ARE ORIGIN?

It's important you have peace of mind about your chosen pool company, so in addition to speaking to existing customers and seeing previous examples of our work, it's also essential to know who we work with and what we offer:

- Accredited members of SPATA (the Swimming Pool and Allied Trades Association).
- Proud recipients of over 30 UK Pool & Spa and SPATA Awards.
- Members of the Federation of Master Builders
- We offer a 10 year warranty

Simply put, we're a swimming pool company that does it all. Made up of a team of experts ranging from designers and architects to engineers, there's one thing we all have in common - we are passionate about swimming!

## OUR TIPS AND TRICKS

If you're looking for more information or want a more in depth look at some of our previous projects why not take a look at our case studies? Located under the 'Pools' tab on our website, these case studies guide you through a variety of projects and explain the inspiration and challenges behind them. The case studies cover everything from building a swimming pool in a conservation area to having to change the design at the last moment.

Our advice centre is also full of articles on the latest swimming pool trends, eco friendly substitutes and insider knowledge on what it takes to actually build a swimming pool. Our social media accounts showcase the latest completed projects and are a viable tool for anyone looking to take the plunge and begin the undertaking of owning an indoor swimming pool. Make sure to follow us on all accounts so you don't miss out!
